Profile

Full Stack Developer with practical experience in developing dynamic web applications using both the MERN stack (MongoDB, Express.js, React, Node.js) and Spring Boot. Well-versed in building RESTful APIs, managing application state, and designing efficient databases. Experienced with various Spring frameworks including Hibernate. Adept at working in Agile environments, using Git for version control, and deploying applications with modern tools. Committed to delivering scalable, user-focused solutions that support business growth.

Education

BS Computer Science (BSCS), Air University Kamra Campus 📄 09/2022 – present

Related Coursework: Programming Fundamentals, Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Android Development, Visual Programming, Full Stack Development, Artificial Intelligence, Operating Systems, Software Engineering, Computer Networks

CGPA: 3.4

Experience

Junior Software Developer, Alabtaal Developers 05/2023 – 12/2024

At Alabtaal Developers, I contributed to developing a software solution for Madrassah alumni to manage records and generate performance reports using Java Spring Boot. I utilized Jira for project management, Docker for deployment, and GitHub for version control, gaining valuable experience in agile methodologies and enhancing my software engineering skills.

Projects

Software Services Platform 📄

The platform is a modern software service agency specializing in blockchain development. Developed through TailwindCss, React.js, Node.js, vite.

Portfolio Website - React.js, TypeScript, Tailwind CSS, Vite 📄

A personal portfolio website built with React, TypeScript, Tailwind CSS, and Vite, showcasing projects, skills, and contact information, featuring a modern, responsive design and hosted on Vercel.

SmartCampus (Desktop + Web App) 📄

Complete academics management solution designed for both desktop and web platforms. It streamlines administrative tasks, student management, course registrations, and advance academic workflows.

Technologies Used: J2EE, JavaFX, SpringBoot, JasperReports, React, Node.js

Spotify Analysis

Data Modeling | Data Processing | DAX Calculations | Dashboard Lay outing

Technologies Used: PowerBi, DAX Calculations , KPI , Python (Data Cleaning, Modeling, Processing)
